Commenting on the results and performance, Mr. Paresh Zaveri, Chairman & Managing Director of Aurionpro Solutions Limited said:

“On the back of general slowdown in the Industry, the performance for the quarter and nine months ended FY20 remained subdued.

Performance was impacted largely due to the postponement of the orders by the key segment of our clientele, due to curtailment of the budgeted spending amid weak economic scenarios and some stalled projects, attributed to the consolidation of PSU Banks in India.

Exuding confidence on the business outlook, the green shoots are visible in last few days and some stalled projects have restarted as well. We are seeing new RFP flows and order wins and we are confident that the momentum will be regained and will be back on track by Q1 of the next financial year.

Despite overall slowdown our Banking & Fintech business vertical witnessed robust performance for the quarter and nine months with revenue growth of 24% and 16% respectively and we optimistic of sustaining the visibility for coming period.”
